

**LAKE  
WINNIPEG  
FOUNDATION**

## **For Teachers**

LWF's education program assists educators to engage students on water stewardship issues and inspire youth action.

We offer in-class presentations and funding for water-related learning. In addition, we are happy to partner with individual teachers and/or schools in the collaborative development of more tailored educational opportunities - providing customized tools, resources and other supports that can be integrated into existing curriculum and delivered via multiple points of contact over the course of the school year.

To learn more, download our [education program information sheet](#), explore the links below or [contact Marlo Campbell](#), LWF Communications Director.
